Características

Dados Técnicos

Torque Nominal: entre 2000 Nm até 30.000 Nm.

Flange conforme DIN / ISO 5211, DIN 3337.

Ângulo de rotação: 90 ° com ajuste do curso de -5 ° + 95 °.

Pressão do ar: a partir de 3 bar até 8,5bar (para o Torque, ver Tabelas)

Para a versão de duplo efeito, o torque é diretamente proporcional à pressão de alimentação de ar do actuador

Para a versão Mola de Retorno do "binário de retorno" (sem pressão de alimentação de ar no actuador) depende apenas da Mola, não está relacionada com a pressão de alimentação de ar

Versões disponíveis: dupla ação, Mola de retorno normalmente fechado (NC), Mola de retorno normalmente aberto (NA).

Versões corpo cetral: Scotch Yoke "simétrica" ou Scotch Yoke "chanfrada

Condições de trabalho

Escala de temperatura: versão Standard: de -20 ° C a até + 80 ° C (material selos: NBR).

Versão Alta Temperatura: de -20 ° C até + 150 ° C (material: FKM / Viton).

Abastecimento de mídia: ar filtrado, não necessariamente lubrificado, gases inertes, gás técnico

Para a temperatura inferior a 0 ° C utilize ar seco

Em caso de ar lubrificado, utilize óleo não detergente compatível com os selos.

regulamentos de design

Design de acordo com EN 15714-3, ISO 5211, ISO 12490

CARACTERÍSTICAS E BENEFÍCIOS

CARACTERÍSTICAS E BENEFÍCIOS

1	Tiras auto-lubrificantes e energizadas	Menos atrito entre pistão e cilindro	
		Isso impede a ligação do selo ao cilindro, mesmo após longos períodos de inatividade	
		Reduz o efeito "stick-slip"	
2	Entalhes, buchas e pinos feitos em aço cromado com dureza de cerca de 200 HB	Maior resistência à corrosão	
		Menos atrito entre caule, barra guia e buchas deslizantes e, consequentemente, menos desgaste sobre as partes relevantes	
3	Sistema de conversão de movimento de linear para rotativo separado do fluido de pilotagem do atuador.	Capacidade de alimentar o atuador com gases	
		Previne atmosferas explosivas	
4	Sistema Scotch Yoke com atrito de rolamento (conversão de movimento linear para sistema rotativo sem engrenagens).	Redução do atrito entre pistão e eixo com consequentemente menos desgaste sobre as partes relevantes	
		Habilitado Torque Break Away (BTO & BTC)	
	Buchas de bronze	Garantem um menor desgaste do que buchas em outros materiais	
	Certificado ATEX	Instalação permitida em ambiente potencialmente explosivo	
	Certificado SIL 3	Garantia de elevado nível de segurança funcional.	

Certificado PED (Em progresso)

Em cumprimento com as normas europeias de segurança para equipamentos de pressão

Especificação de padrão de pintura Omal

Especificação de padrão de pintura Omal

A pintura dos Atuadores Heavy Duty (padrão OMAL), mencionado na Tab, permite a instalação ao ar livre dos atuadores; fábricas de produtos químicos, gasodutos, refinarias e aplicações off-shore.

A pedido são disponíveis os ciclos de pintura de acordo com as especificações do cliente

PREPARAÇÃO DA SUPERFÍCIE		Jateamento de GRAU SA 2.1 / 2
Revestimento	Tipo de pintura	Espessura do filme seco
Revestimento primário	Revestimento primário de zinco inorgânico	75 µ
Revestimento intermediário	epóxi	110 µ
Revestimento final	poliuretano	40 µ
Espessura total do filme seco		225 µ
Padrão: RAL 5010		

Corpo Central - configurações disponíveis

DESIGN ASIMMETRICO
CANTED DESIGN

DESIGN SIMMETRICO
SYMMETRICAL DESIGN

DESENHO inclinado

Muito alta pausa de abertura do Torque, com uma enorme queda durante a etapa final da operação de abertura (ETO). A pausa de fechamento do Torque é muito menor do que a pausa para abrir o Torque.

DESENHO simétrico

A curva do torque está mais equilibrada; os valores BTO (pausa para abrir) - ETO (final da abertura) -BTC (pausa para fechar) - ETC (final do fechamento) são semelhantes

Torque Tabela - NC - 3 BAR

Componentes

Pos	descrição	materiais
1	Corpo central	aço carbono
2	cabeçote	aço carbono
3	cabeçote bucha	Bronze
4	Barra de impulso	Ligas de aço (cromado)
5	bloco de deslizamento	Bronze
6	Válvula de ventilação (não exibido)	latão
7	bloco guia	aço carbono
8	Tirante	Ligas de aço
9	Haste do êmbolo	Ligas de aço (cromado)
10	pistão	aço carbono
11	flange de extremidade	aço carbono
12	O-ring	NBR
13	tubo de cilindro	aço carbono (niquelado)
14	haste bucha	Aço + bronze + PTFE
15	selo	NBR + Poliuretano
16	O-ring	NBR
17	anel deslizante	PTFE + grafite
18	O-ring	NBR

19	parafuso de ajuste de cessação	Ligas de aço
20	parafuso de ajuste de cessação	Ligas de aço
21	Mola	Ligas de aço
22	Cartucho mola	aço carbono
23	bucha	Aço + bronze + PTFE
24	bucha	Aço + bronze + PTFE
25	Haste do cartucho mola	Ligas de aço (cromado)

Acessórios disponíveis para processos de emergência

Acessórios disponíveis para processos de emergência

Per attuatore doppio effetto
For double acting actuator

Per attuatore semplice effetto
For spring return actuator

MANUAL HIDRÁULICO DE SUBSTITUIÇÃO

bomba compacta
cilindro hidráulico
tanque de óleo
válvula de retenção
válvula de escape

Carretel – Haste de extensão

O projeto do atuador levou em consideração a montagem de almofadas de conexão em conformidade com as mais recentes normas internacionais para uma montagem fácil e direta de válvulas e auxiliares.

Omal completa o seu serviço com kits de montagem personalizados, carreteis e extensão da haste.

Módulos de Projeto de Construção

Os módulos de projeto dos atuadores Omal "Heavy Duty" garantem uma completa versatilidade de aplicação .

O módulo de construção permite a montagem dos componentes de acordo com os requisitos de aplicação.
